

Reduce waste while creating jobs and training opportunities in a tough economy

Computers donated to Goodwill:

- Have helped us recycle 2.5 million pounds of electronic waste, including residential and business computers, televisions, and electronics
- Give our participants the computer skills necessary to be “job ready” in today’s economy.
- Allows our participants who successfully graduate from one of our computer programs to receive a refurbished computer

Goodwill Industries of San Francisco, San Mateo and Marin Counties’ mission is to create solutions to poverty through the businesses we operate. We provide training and career services to people who have significant difficulties finding lasting employment, including homelessness, long-term welfare dependency, a criminal record, a history of substance abuse, or limited English proficiency. At Goodwill, we generate 85% of our revenue through the businesses we operate. Every month, we serve 325 program participants, place 73 people in jobs, process over 100,000 retail transactions, and divert 1.5 million pounds of material goods from landfill.
